MODERN PENTATHLON FEDERATION OF SRI LANKA

# BestWeb.LK 2027

# Website Competition Readiness Review & Master Checklist

Strategic objective: Position MPFSL as a leading national sports federation website and compete for Gold in the Best Sports & Fitness Website category.

**Target internal score:** 135+/150

**Primary category recommendation:** Best Sports & Fitness Website
**Secondary opportunities:** Best Mobile User Experience, Most Popular Website and overall awards.

Prepared for MPFSL – October 2026

# 1. Executive Summary

This document provides a competition-oriented improvement plan for the MPFSL website (mpfsl.lk) ahead of BestWeb.LK 2027. The strategy is not limited to visual redesign: it addresses technical quality, performance, design, content, security, accessibility, search visibility, innovation and competition readiness.

**Important:** the live website could not be fully crawled during the initial review because the current web access encountered a redirect/access issue. Accordingly, this document does not invent page-level defects. It provides a verified competition framework and a practical implementation checklist to be completed against the live site.

The strongest positioning is **Best Sports & Fitness Website**, rather than a generic 'Other' category, because MPFSL is a national sports federation and the website can demonstrate athletes, competitions, results, development programmes and international participation.

Recommended digital positioning: **“The Digital Home of Modern Pentathlon in Sri Lanka.”**

# 2. BestWeb.LK Scoring Strategy

| Area | Maximum | MPFSL Target | Priority |
|---|---|---|---|
| Technical | 30 | 28+ | Critical |
| Performance | 20 | 18+ | Critical |
| Design | 20 | 19+ | High |
| Content | 30 | 28+ | Critical |
| Security | 20 | 19+ | Critical |
| Bonus | 30 | 25+ | High |
| Total | 150 | 135+ | Gold target |

The targets above are **internal project targets**, not official BestWeb.LK cut-off scores.

# 3. Recommended Website Architecture

The website should evolve from a federation information site into a structured sports information platform.

| Primary area | Recommended sections |
|---|---|
| Home | Hero; key achievements; upcoming competitions; athletes; latest news; quick links |
| About MPFSL | History; vision; mission; executive committee; technical committee; coaches; officials; affiliations; governance |
| Modern Pentathlon | Sport overview; five disciplines; rules; equipment; beginner guide |
| Athletes | National team; junior athletes; women's team; men's team; profiles; rankings; achievements |
| Competitions | Calendar; national championships; Laser Run; Biathle/Triathle; international events; registration; results |
| International | UIPM; Asian competitions; World Championships; World Cups; Asian Games; international achievements |
| News & Media | News; press releases; photo gallery; video gallery; media coverage; downloads |
| Development | Youth; schools; talent identification; coaching; officials; athlete development |
| Results & Statistics | Results explorer; national rankings; records; athlete statistics |

| Primary area | Recommended sections |
|---|---|
| Resources | Rules; regulations; circulars; forms; policies; downloads |
| Contact | Contact form; address; telephone; email; map; social media |

# 4. Homepage – Competition Standard

The homepage should communicate national authority, athlete development and international ambition within the first screenful.

**Recommended hero message:** “Modern Pentathlon Sri Lanka – Building Champions. Inspiring Excellence.”

Recommended homepage sequence: Hero → federation statistics → latest achievement → upcoming competitions → featured athletes → latest news → international pathway → media gallery → newsletter/contact.

Use authentic, high-quality Sri Lankan competition photography rather than generic stock images. Every major image should have meaningful alternative text and be optimised for web delivery.

# 5. Athlete & Results Platform

This is one of the strongest opportunities to differentiate MPFSL from a conventional federation website.

- Create searchable athlete profiles with photo, event/category, achievements, international participation and approved statistics.
- Create a Results Centre searchable by year, competition, gender, age category and athlete.
- Create National Rankings with clear methodology and date of last update.
- Create a Competition Calendar with event details, venue, registration, documents, results and media.
- Create a Hall of Fame / Digital Museum showing historical champions and federation milestones.

# 6. Technical Readiness – 30 Points

- All pages and navigation links function correctly.
- No placeholder or incomplete content.
- Search function is available and useful.
- XML sitemap, robots.txt and clean URLs are implemented.
- Canonical URLs and structured data are implemented.
- Breadcrumbs are available on deep pages.
- Professional 404 page is available.
- Contact forms have validation and spam protection.
- Privacy policy and cookie policy are published.
- Responsive behaviour is verified on current desktop, tablet and mobile browsers.
- Heading hierarchy, labels, focus states and keyboard navigation follow accessibility principles.
- Browser console shows no critical errors on key pages.

# 7. Performance Readiness – 20 Points

- Internal target: Lighthouse/PageSpeed performance score 90+ on mobile.
- Internal target: Lighthouse/PageSpeed performance score 90+ on desktop.
- LCP target below 2.5 seconds.
- CLS target below 0.10.

- TBT target below 200 ms where practical.
- Images are served in WebP/AVIF and appropriately sized.
- Lazy loading is used for non-critical images.
- CSS and JavaScript are minified and unnecessary assets removed.
- Fonts are optimised and limited to required families/weights.
- CDN/caching is configured where appropriate.
- Large autoplay videos and oversized hero images are avoided or optimised.
- Performance is tested on real mobile devices and realistic Sri Lankan network conditions.

## 8. Design & User Experience – 20 Points

- Strong and consistent MPFSL visual identity.
- Clear navigation and page hierarchy.
- Professional typography and readable body text.
- High-quality authentic sports photography.
- Consistent cards, buttons, icons and spacing.
- Clear calls to action.
- Mobile-first layout and touch-friendly controls.
- Professional galleries and video presentation.
- Good colour contrast and visible focus states.
- Competition and athlete information can be discovered within a few clicks.

## 9. Content – 30 Points

- Complete federation history, vision and mission.
- Current executive committee and relevant committees.
- Current athlete, coach and official information.
- Competition calendar and historical results.
- National rankings and records where officially maintained.
- Regular news and press releases.
- International participation and achievements.
- Asian Games pathway and other major international milestones.
- World Cup / World Championship participation stories.
- Professional photo and video galleries.
- Rules, regulations, policies and downloadable documents.
- Beginner guide: how to become a modern pentathlete.
- Content is grammatically correct and consistently edited.
- Every important page has a meaningful SEO title and description.
- Images have descriptive alt text.
- Content is updated regularly with visible publication/update dates.

## 10. Security – 20 Points

- HTTPS enforced across the entire site.

- TLS configuration is current and strong.
- HSTS enabled where appropriate.
- WAF and DDoS protection are considered/implemented.
- Security headers are correctly configured.
- Content Security Policy is implemented where feasible.
- OWASP Top 10 review completed.
- Authentication and administrator access are hardened.
- MFA is enabled for privileged accounts where supported.
- Rate limiting and abuse protection are applied to forms and authentication.
- Secure cookies and session handling are configured.
- File uploads are validated and restricted.
- Dependencies/plugins are updated and vulnerability monitoring is established.
- Backups are automated and restoration is periodically tested.
- Security monitoring and incident response contacts are defined.

## 11. Innovation & Bonus Opportunities – 30 Points

Prioritise features that add genuine visitor value. Do not add technology merely for appearance.

- Sinhala language version with professional human review.
- Tamil language version with professional human review.
- AI assistant grounded in approved MPFSL information.
- Interactive Modern Pentathlon explanation covering the five disciplines.
- Interactive athlete search and profiles.
- Interactive results explorer.
- Interactive national ranking system.
- Competition notifications and/or reminders.
- MPFSL newsletter subscription.
- Digital Hall of Fame / historical timeline.
- Advanced filtering and smart site search.
- Optional PWA capabilities if they materially improve the user experience.
- Video-rich storytelling and athlete interviews.
- 360-degree/immersive experience if budget and content quality justify it.
- Voice search or other assistive interaction if robustly implemented.

## 12. SEO & Accessibility Checklist

- Unique SEO title for every indexable page.
- Useful meta description for every important page.
- Open Graph and social sharing metadata.
- Organization/SportsOrganization schema.
- Event schema for competitions.
- Article schema for news.
- Person schema for athlete profiles where appropriate.

■ BreadcrumbList schema.

■ XML sitemap submitted to search engines.

■ Search Console monitoring configured.

■ WCAG-oriented keyboard navigation.

■ Meaningful alternative text for informative images.

■ Captions/transcripts for important videos.

■ Form labels and accessible error messages.

■ Skip-to-content mechanism.

# 13. Governance, Trust & Compliance

■ Constitution/governance information where appropriate.

■ Selection criteria and relevant regulations published.

■ Athlete safeguarding/welfare information.

■ Anti-doping information and official links.

■ Complaints/contact process.

■ Privacy policy.

■ Cookie policy and consent mechanism where applicable.

■ Copyright/photography permissions documented.

■ Clear ownership and official contact information.

■ No copied articles, images or third-party content without permission.

# 14. BestWeb.LK Competition Strategy

**Phase 1 – Foundation:** Technical, security, mobile, performance, accessibility and SEO audit.

**Phase 2 – Content:** Athlete profiles, results, rankings, competition calendar, news, international participation, Hall of Fame and media centre.

**Phase 3 – Innovation:** AI assistant, interactive pentathlon, results explorer, multilingual content, notifications and newsletter.

**Phase 4 – Competition:** Lighthouse testing → accessibility review → security assessment → TopWeb.LK opportunity → remediate findings → BestWeb.LK submission → legitimate public voting campaign.

**Important:** use TopWeb.LK as a practical pre-competition feedback mechanism where available, rather than waiting for BestWeb judging to reveal weaknesses.

# 15. Public Voting / Most Popular Strategy

If MPFSL reaches the public-voting stage, build an ethical campaign through athletes, coaches, parents, schools, clubs, supporters and official social channels. Do not use bots, fake accounts, duplicate ratings or other manipulation.

# 16. Master Pre-Submission Checklist

## Eligibility

■ mpfsl.lk is a valid .lk domain and does not simply redirect to another domain.

■ Official application contact and organisation details are correct.

■ Correct competition category is selected.

■ Competition registration and required fee are completed when the 2027 process opens.

## Technical

■ All links tested.

■ All forms tested.

■ Search tested.

■ 404 tested.

■ XML sitemap and robots.txt tested.

■ Structured data tested.

■ Responsive layout tested.

■ Accessibility smoke test completed.

## Performance

■ Mobile performance ≥90 target.

■ Desktop performance ≥90 target.

■ Core Web Vitals reviewed.

■ Images optimised.

■ Caching/CDN reviewed.

■ No major console or network errors.

## Design

■ Homepage finalised.

■ Navigation finalised.

■ Mobile UX finalised.

■ Brand consistency checked.

■ Photography and media quality checked.

## Content

■ All key federation pages complete.

■ Athlete profiles complete.

■ Results database complete.

■ Competition calendar complete.

■ News current.

■ International achievements documented.

■ Rules/policies/resources complete.

■ Grammar and spelling checked.

## Security

■ HTTPS and TLS verified.

■ Security headers verified.

■ WAF/DDoS controls reviewed.

■ OWASP review completed.

■ Admin accounts hardened.

■ Backups tested.

■ Vulnerability/dependency review completed.

### Bonus

■ Multilingual capability.

■ AI assistant or smart search.

■ Interactive results/rankings.

■ Interactive pentathlon education.

■ Notifications/newsletter.

■ Hall of Fame/digital museum.

■ At least one distinctive innovative feature that adds real visitor value.

## 17. Recommended MPFSL Target

**Primary objective:** Compete for Gold in Best Sports & Fitness Website 2027.

**Internal target:** 135+/150, with no avoidable penalty exposure.

**Strategic differentiator:** combine federation authority with an athlete/results/competition platform and an exceptional mobile experience.

**Core message:** the website should demonstrate that MPFSL is not only administering the sport, but actively building a modern, transparent and internationally connected sporting ecosystem in Sri Lanka.

This document should be used as the master checklist for the website development, content and competition preparation teams. Each item should be assigned an owner, target date and status before the final competition submission.

Prepared as a competition-readiness planning document. Official BestWeb.LK 2027 dates, rules and scoring details should be reconfirmed when the 2027 competition announcement is published.
